

## PRODUCT OVERVIEW

Aluminum Profile "S1" is a surface mounted aluminum housing for LED strips that comes with a rounded, white lens. It uses a unique track mounting system which allows you to install the profile, conceal wire, and snap it into place with no visible mounting hardware. Aluminum Profile "S1" can accommodate any high-output LED strip up to 0.66" (16.8mm) wide, and properly disperse heat from the strips to maximize their lifetime. The compact and slim design of "S1" makes it an ideal solution for task, shelf, and high-output cabinet lighting applications. Create DOTLESS LED lighting in aluminum channel "S1" when you select a white lens and use one of our DOTLESS LED strips. Aluminum Profile "S1" is sold in 6.5ft lengths as a kit including a pair of end-caps, mounting track, and one round clear or white lens.

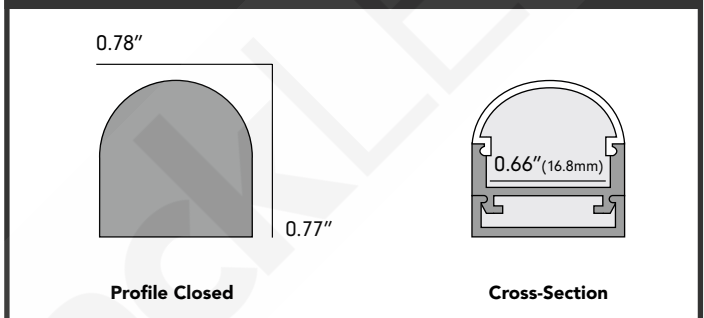

### Features

- Unique compact round design.
- DOTLESS when used with our high-density LED strips.
- Conceal wire and mounting hardware (mounting track).
- Maximizes Lifetime of LED strips by dissipating heat.
- Easy to install with included mounting track.
